

TEBELLO LELOSA

Project Engineer | Supply Chain & Operations Professional

Phone: 078 481 8711 | Email: tlelosa@gmail.com

Location: Johannesburg South, Gauteng, 2190

Citizenship: South African | BEE | Driver's Licence: Code 8 (Own Vehicle)

PROFESSIONAL SUMMARY

Operations and Engineering professional with 19+ years of experience across industrial engineering, manufacturing operations, and supply chain management. Distinguished by an exceptional promotion trajectory -- earning five career promotions from CNC Programmer to Project Engineer -- reflecting deep expertise in manufacturing processes. Deeply experienced in stakeholder management, supplier negotiation, and cross-functional team coordination across engineering, quality control, and logistics. Multilingual professional fluent in English, Afrikaans, and Zulu, with native Sesotho -- enabling effective communication across diverse teams and stakeholders.

CORE COMPETENCIES

Project Management | Full Lifecycle Delivery | Tender Compilation & Bidding
Supply Chain & Procurement | Strategic Sourcing | Supplier Negotiation
Engineering & Technical | Mechanical Engineering Principles | CNC Programming (Fanuc)
Leadership & Communication | Multi-Site Operations | Executive Reporting

PROFESSIONAL EXPERIENCE

Operations Foreman

FanMovement (Pty) Ltd | October 2025 - Present

FanMovement is a manufacturer of industrial air and gas movement equipment, serving mining, power generation, and industrial sectors.

- Supervise daily production and workshop operations manufacturing industrial air and gas movement equipment.
- Coordinate operational workflow between engineering, production, procurement, and stores departments.
- Monitor inventory levels, material availability, and stock movement to maintain uninterrupted production.
- Support operational planning through materials coordination and task allocation across teams.
- Ensure compliance with health, safety, and quality standards in all workshop activities.
- Provide operational updates to management on production progress and material utilisation.

Project Engineer

Howden Africa | May 2023 - March 2024

Returned to Howden Africa to manage engineering projects and industrial client portfolios.

- Managed engineering projects and industrial client portfolios across power generation and heavy industry sectors.
- Prepared tender submissions and project cost estimates using historical engineering data.
- Coordinated project delivery across engineering, procurement, manufacturing, and supplier networks.
- Maintained project records and documentation within Microsoft AX ERP and CRM systems.
- Attended site meetings and client KPI reviews to ensure project alignment.
- Monitored outstanding orders and debtors to maintain project financial control.

Project Officer

Polyco (Sustainability & Recycling) | March 2020 - June 2022

Polyco is South Africa's leading polyolefin producer responsibility organisation, driving sustainable packaging and recycling initiatives na

- Directed end-to-end rollout of 4 static Packa-Ching buy-back centres from initial planning through successful launch, establishing recycling
- Orchestrated procurement of cages, bins, and specialised equipment across multiple suppliers, coordinating delivery timelines to ensure all
- Managed performance of project partners including bin suppliers, BCM installation teams, BCMDA fencing contractors, and Packa-Ching equipmen
- Reported weekly project status directly to the CEO, providing transparent progress tracking, risk identification, and mitigation recommendat
- Coordinated with internal marketing team and external creative agency to develop and execute launch campaigns, driving community awareness a
- Represented Polyco at government and stakeholder meetings in East London, building strategic relationships with municipal authorities and co
- Facilitated SST (Social Sector Transformation) research process linked to BCM operations, contributing evidence-based insights to shape Poly

Project Engineer

Howden Africa | January 2018 - June 2019

Howden Africa is a leading manufacturer of power station equipment and components, supplying critical machinery and services to Eskom's g

- Managed full project lifecycle for assigned Eskom power station portfolio spanning 7 major stations (Camden, Duvha, Lethabo, Kendal, Majuba,
- Compiled detailed costing sheets for each project, analysing material, labour, and overhead costs to maximise profit margins while remaining
- Managed end-to-end tender compilation on the CRM system, ensuring all pricing margins aligned with strict company guidelines and risk thresh
- Processed and tracked client enquiries from receipt through to order confirmation, escalated pricing negotiations to suppliers, and leverage
- Maintained regular client site visits across the power station portfolio, attending KPI meetings with Eskom customers to review performance,
- Managed the divisional order book, conducted proactive debtor follow-up to accelerate cash flow, and maintained full SOX compliance across a
- Updated all enquiries, orders, and project milestones on ERP systems (CRM and Microsoft Dynamics AX), ensuring data integrity and real-time

Junior Project Engineer

Howden Africa | January 2015 - December 2017

Promoted from Contract Stock Controller in recognition of exceptional client relationship management, commercial acumen, and consistent de

- Managed a dedicated client portfolio with weekly power station site visits, building trusted relationships with Eskom engineers, maintenance
- Resolved on-site client queries in real time and provided proactive delivery updates during critical projects and planned outages, minimisin
- Processed technical enquiries by researching historical project data, analysing specifications, and compiling detailed costings that formed
- Compiled tenders on the CRM system and managed the full enquiry-to-order pipeline, ensuring seamless handoffs between sales, engineering, pr
- Conducted proactive debtor follow-up and managed CRM system data integrity, reducing outstanding accounts receivable and improving the divis
- Earned promotion to Project Engineer based on a direct customer recommendation to Howden management -- a rare endorsement that underscored e
- Maintained rigorous SOX compliance across all processes and consistently exceeded minimum site visit requirements, demonstrating commitment

Contract Stock Controller

Howden Africa | October 2014 - December 2014

First role at Howden Africa, entering the power generation sector and establishing the foundation for a rapid promotion trajectory.

- Coordinated manufacture and procurement of contract stock spares for multiple Eskom power stations, ensuring critical components were available
- Managed project budgets, invoicing, and cost negotiations with suppliers, identifying savings opportunities and optimising spend across the
- Developed comprehensive outage bar charts using Microsoft Project, mapping manufactured and procured item timelines to ensure all materials
- Ensured QC requirements were met across the full procurement chain -- integrating procurement, engineering, quality assurance, and supplier
- Coordinated logistics and deliveries to the Middelburg central storage site within agreed lead times, implementing proper packaging and mark
- Adhered strictly to health and safety standards in accordance with company policy and legislative requirements, maintaining a zero-incident

Supply Chain Supervisor

Morgan Advanced Materials | January 2012 - March 2014

Morgan Advanced Materials is a global manufacturer of advanced ceramics, carbon, and composite materials serving industrial sectors including

Promoted from Production Planner for demonstrating exceptional planning capability, analytical rigour, and cross-functional leadership.

- Oversaw production planning and material resource planning for Mechanical and Electrical departments, synchronising manufacturing schedules
- Facilitated Sales & Operations Planning (S&OP) processes, aligning sales forecasts, production capacity, and inventory targets to optimise
- Forecasted material requirements and performed sales-to-budget gap analysis, identifying variances early and implementing corrective actions
- Planned and executed bi-annual stocktakes across 4 manufacturing sites, coordinating cross-functional teams and ensuring inventory accuracy
- Sourced alternative suppliers to reduce procurement costs and mitigate supply chain risk, diversifying the vendor base and negotiating favourably
- Managed inventory turnover rates and implemented proactive stock-out prevention measures, reducing production disruptions and improving on-time
- Produced Requirements to Plan (RTP) for materials and reported on total inventory value to management, providing visibility into working capital

Production Planner

Morgan Advanced Materials | January 2009 - December 2011

Promoted from CNC Programmer & Operator upon completion of National Diploma, transitioning from shop floor execution to planning and scheduling

- Executed rough cut and finite capacity planning for production schedules, balancing machine availability, labour resources, and material consumption
- Scheduled and prioritised manufacturing orders using Pre-Actor production scheduling software, optimising sequence to minimise changeover time
- Built comprehensive Bill of Materials (BOMs) and Routings for production orders, ensuring accurate material allocation, process sequencing,
- Produced detailed production plans for workshop supervisors, translating demand forecasts into actionable daily and weekly manufacturing schedules
- Expedited urgent orders to maintain delivery schedules, dynamically re-sequencing production runs and coordinating with procurement to fast-track
- Processed production orders to the workshop floor, monitoring progress against plan and intervening proactively to resolve bottlenecks, materials
- Conducted materials cost analysis on completed orders, comparing actual versus planned costs to identify variances, root causes, and improve
- Key Performance Indicators: Plan achievement percentage, OTDIF (On-Time Delivery In Full), Production lead time -- all tracked and reported

CNC Programmer & Operator

Morgan Advanced Materials | November 2006 - December 2008

Entry-level role that launched a distinguished career in manufacturing and engineering, earning promotion to Production Planner upon completion

- Programmed CNC lathes using Fanuc coding language, translating engineering specifications into efficient machining programmes that produced
- Operated CNC equipment to manufacture products in strict accordance with technical drawings and quality standards, maintaining consistent output
- Interpreted and verified technical drawings for accuracy before machining, identifying potential issues early and coordinating with engineer
- Earned promotion to Production Planner upon successful completion of National Diploma in Engineering (Mechanical), recognised for technical

EDUCATION

National Diploma: Engineering (Mechanical)

Tshwane University of Technology | 2003 - 2008

Matric (Grade 12)

Harvest Christian School | 2002

CERTIFICATIONS & TRAINING

- DuPont Safety Training Observation Program | 2010
- CAD - Pro Engineer Wildfire 3.0 | Product One | 2008
- Strategic Business Presentations | 2011
- Create a Visually Managed Workplace | Thinking People | 2011
- Essential Assertiveness Skills | Kwelanga Training | 2011

TECHNICAL SKILLS

ERP Systems: Microsoft Dynamics AX, CRM Systems, Macola ES (Exact)

Planning & Scheduling: Primavera, Microsoft Project

Reporting & Analysis: Crystal Reports, Microsoft Excel (Advanced)

CAD Software: Pro Engineer Wildfire 3.0, AutoCAD

Office Suite: Microsoft Word, Excel, PowerPoint, Outlook

Programming: Fanuc CNC Programming Language

LANGUAGES

- Sesotho -- Native
- English -- Fluent
- Afrikaans -- Fluent
- Zulu -- Fluent
- Setswana -- Conversational
